

# Hepatitis Resources

## DIRECTORY

HepSource is a national directory of hepatitis information and educational materials. The directory is published by the American Liver Foundation, through a Cooperative Agreement with the Centers for Disease Control and Prevention. The directory contains five sections that contain useful information relative to hepatitis control and information. The first is an introductory section. The second contains brief descriptions of organizations interested in hepatitis, the services they provide, and the types of educational materials they produce. The third section lists brochures, videos, newsletters, and other educational titles relating to hepatitis. The fourth section lists Internet Web sites that provide hepatitis information. The fifth section provides a useful template to develop additional hepatitis resources in your area. The directory can be obtained through the Program Department of the American Liver Foundation at 75 Maiden Lane, Suite 603, New York, NY 10038, 800-4HEP-ABC.
